- **Backend:** Node.js, Express.js, RESTful API, GraphQL, Postman
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Development tools:**
    - *Code editor*: Visual Studio Code
    - *Version control*: Git, GitHub, BitBucket
    - *Package management*: npm
- **Other**: Microsoft Office, Agile project methods, Scrum, Chrome Dev Tools

WORK EXPERIENCE

FRONTEND DEVELOPER
Mojjo AB, internship * April 2025 – Present
- Boost By Mojjo delivering an innovative and inspiring new platform aimed for startups.
- Part of a cross-functional team of 7, contributing as a frontend developer. Involved in the full agile cycle, from planning to building a new platform.
- Actively sharing expertise and fostering a collaborative environment that inspires creativity and enthusiasm.
- Conducting research on modern frameworks to guide strategic decisions and ensure scalable platform development.
- Engineering interactive and responsive web components using Next.js, TypeScript, Tailwind CSS and Shadcn/UI to deliver seamless and accessible user experiences.

FULLSTACK DEVELOPER
Propida Solutions AB, project * February 2024 – November 2024
- Propida delivers a robust case management system tailored to the property industry (proptech).
- Engineering interactive and responsive fullstack web components using React, JavaScript, GraphQL and PostgreSQL.
- Contributed to UI/UX design, participated in client meetings and helped translate user needs into technical solutions. Engineered 3+ scalable solutions now active in production, improving usability and reducing UI complexity across core user flows.
- Collaborated in a team of 3 using Git for structured version control and followed coding standards to improve readability and team collaboration.
- Highly appreciated for my ability to interact effectively with people, my strong drive and my focus on collaboration, clear communication and a solution-oriented mindset.

FULLSTACK DEVELOPER
Byggdagboken, internship * September 2023 – December 2023
- Byggdagboken delivering a web-based tool developed for the construction industry.
- As part of an agile team of 3+ teammates, I contributed to building a login page to improving interface clarity, resulting in fewer support requests and smoother log in process. Using both frontend and backend technologies like React, JavaScript and Node.js.
- During my 10-week internship, I received praise for strong interpersonal skills and the ability to engage effectively in team environments.

CUSTOMER SERVICE ADVISOR
SEB and SEB Kort * September 2009 – May 2024
- During my 15 years in different customer service advisor roles, I delivered high-quality, tailored support to a large volume of customers, ensuring satisfaction and loyalty.
- Quickly resolved complex issues to uphold a consistently high customer experience.
- Fostered long-term relationships through active listening and clear, solution-focused communication.
- Consistently contributed to teams of 10+ people, fostering close collaboration both within the team and across departments.
- Praised for my positive attitude, attentiveness and strong service orientation, contributing to high customer satisfaction and a motivated team atmosphere.

EDUCATION

FRONTEND DEVELOPER
Lexicon IT-Proffs * November 2024 – April 2025
Advanced frontend development course, covering JavaScript, advanced CSS, modern web frameworks and best practices in responsive and accessible design.
